

Massimiliano Di Carlo

Massimiliano Di Carlo, born in Ascoli Piceno (Italy) at the 9 July 1987 held a lecture combined with an introducing workshop about Western and Eastern oral traditions -THE OVERTONE SINGING at our institution on the 7th of June 2015.

The Klang-Holz e.V. is a nonprofit association of musicians, craftsmen, pedagogues and individuals who are interested in music, building of instruments, education and culture. We offer workshops for individual building of instruments, host several bands and cooperate with the district authority, schools and kindergardens to keep the tradition of handmade music alive and give space to creative interaction. Our weekly classes for building and playing instruments are currently used by about 40 people of different ages and 2000 pupils in round terms visit us every year to build their first instrument and make music together.

Mr. di Carlo is a very qualified lecturer and experienced musician who was able to present a wide scale of Overtone and Undertone singing of different cultures which he could link and compare in a worthwhile and methodic manner. He vividly described the theory of overtones and demonstrated them practically. He also introduced methods to „tune“ the body and prepare the voice as the instrument of the body and lead the participants through those exercises.

We plan to continue our cooperation with Mr. Di Carlo. He will offer workshops for over- and undertone singing in October and November 2015 and throughout 2016. We are very pleased to work with Mr. Di Carlo and are very interested in his further research.

Sincerely,

N. Dittmar, CEO
